Summary

Hi, I'm Eren. Fullstack Developer who loves to code and design experiences on the web. With a passion for coding and an eye for design, I craft seamless online journeys using CSS, JavaScript, Python, React, TypeScript and Solidity.

Experience

Full Stack Developer
Freelance Web Developer
2018 - Present
I'm now a full stack developer working as a freelancer. My stack includes Solidity, CSS, React, Next.js, TypeScript, Tailwind, SQL and WordPress. I'm open to full-time remote opportunities.

Wordpress Developer
VigitalArt
2016 - 2018
We were building premium themes for Envato Market using CSS3, Javascript (jQuery) and Visual Composer integrated with WordPress CMS.

Full Stack Developer
BTdays Technology
2014 - 2016
I helped build a customer loyalty platform which is written in Python using Django Framework called JokerKart. I worked as both backend and frontend developer. Also, my other responsibility was managing Git repos.

Frontend Developer
Novospire
2013 - 2014
I worked as a frontend developer. I've built websites using CSS3 and Javascript (jQuery) integrated with WordPress CMS.

Full Stack Developer
Restoranya Inc.
2009 - 2013 (4 years)
Restoranya was an online food delivery platform that was written in Python using Django Framework.
I worked as both a backend and frontend developer. Also, my other responsibilities were managing
Git repos, databases and servers.

Intern
Pastelboya Interactive
2008 - 2009
I've learned how to design websites and web applications. I've built my frontend and backend skills.

Language

English - Full Proficiency
